Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner agreed that not all claims (i.e. claim 69) recited a laser having an energy level of less than 10 mJ per pulse as stated in the Reasons for Allowance of Paper No. 26, and further that the specific energy level was not a limitation which should be required in the claims. However, in further reviewing the file history, the examiner determined that claim 1 of the '679 patent had been amended to include recitation of a "low power laser", and that applicant asserted this limitation as a feature which distinguished over the prior art. Therefore, the examiner maintains that a recitation of a "low power laser" must be present in the instant application claims to avoid recapture. Recitation of a laser having an energy of around 10 mJ or lower (as in many of the other claims) is deemed to be a recitation of a "low power laser". Applicant has agreed to amend claim 69 (see attached Examiner's Amendment) to add the limitation of a "low power laser".
